About

I am a User Experience Designer, Product Designer, and User Researcher with extensive knowledge of Figma, Microsoft office products, and Adobe Photoshop. As a UX UI Designer, I bring a unique blend of creativity and technical skills that allow me to design intuitive user interfaces that enhance user experiences.

I am a hands-on, collaborative, and energetic UX designer, skilled in Grid and Design Systems. I have completed several projects, including the design of an e-commerce dashboard, a design system, and two mobile apps.

With my background as a computer engineer, I have intermediate knowledge of web and front-end development. I'm a team player but can also be a quick learner and operate independently.

I'm pursuing a job that allows me to fully apply my acquired knowledge and further develop my design and technical skills.

Experience

UX/UI Design Bootcamp (Internship) — Re:Coded Academy
June 2022 to November 2022

UX Design Certificate — Great Learning Academy
July 2022 to August 2022

Work

- **Parkyo**

Car Parking App

I was committed to creating a product that is both user-friendly and visually appealing.

- **EyeMe**

Mobile app for stray dogs

I was responsible for creating the overall look and feel of the app, & the user interface Elements.

- **CashBird**

E-Commerce Dashboard

I was responsible for designing visually appealing, intuitive, and user-friendly interfaces.

- **EyeMe Design System**

EyeMe App

- Create wireframes, prototypes, and high-fidelity mockups to illustrate how the design system will be applied to various parts of the app.
- Collaborate with developers to ensure that the design system is technically feasible and can be implemented efficiently.
